

The National Trails Intermountain Region's Sign Plan Program

National Trails System GIS Network
May 15, 2018

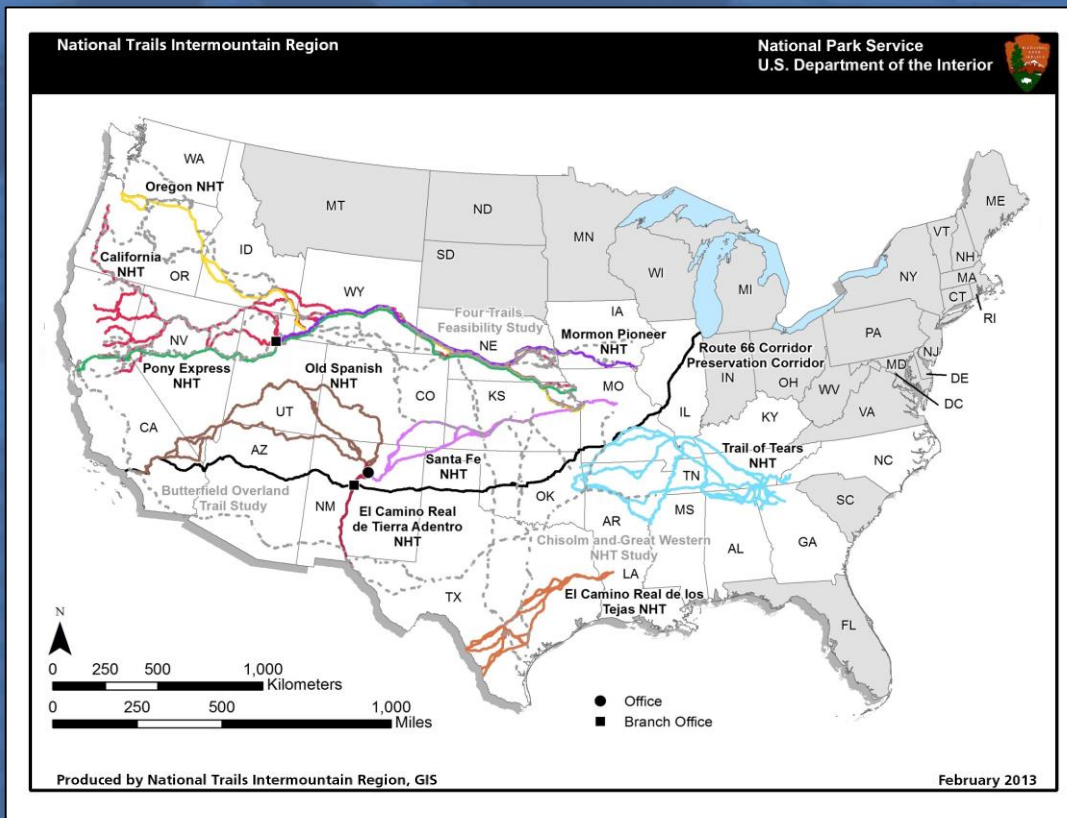

Overview...

- Office background
- Introduction to the Sign Plan Program
- Step-by-step workflow
- ArcGIS Online and Sign Plan Report Tool
- Final product
- Future of the Sign Plan Report Tool

Trails Are Complex...

- We have 3 office locations
- Numerous Partners
- **25,000+** Miles
- 4 NPS Regions
- 24 States
- 466 Counties
- 113 Congressional Districts

GIS

Purpose of Sign Plan Program

- Follows the National Trail System Act (as amended) and follows trail marking guidelines of the CMPs
- Signing the trails raises public awareness
- Opportunity for partners to collaborate and receive technical assistance from trail administration

Goals

- Implement a standardized approach
- Use the capabilities of GIS to create, manage and share sign data
- Create a user-friendly process for partners to create sign plans

WHITE PINE COUNTY SIGN PLAN

Trail(s):
Pony Express National Historic Trail

Area of Interest (County, State):
White Pine County, NV

POEX

0 60 Miles

Partners: N/A
NPS: N/A

Prepared by:

Partners contact: N/A
NPS contact: N/A

Prepared on:
May 11, 2018 11:41 AM

Step by step workflow

1. Partners initiate the process by identifying area and purpose to NTIR
- ★ 2. Partners use AGOL to input signs
3. NTIR collaborates with partners for revisions on the AGOL viewer
- ★ 4. NTIR runs the report tool
5. Partners use sign plan PDFs to take to local road jurisdictions along with an agreement form
6. Signs are ordered and installed

The screenshot shows the 'Road Sign Plan Report' application window. The title bar reads 'Road Sign Plan Report'. The main area contains several sections: 'Plan' with a text input field; 'Report Title' with a text input field; 'Version' with a dropdown menu currently set to 'Draft'; 'Trails' with a list of checkboxes for CALI, ELTE, ELCA, MOPI, OLSP, OREG, POEX, ROSI, and SAFE, along with 'Select All', 'Unselect All', and 'Add Value' buttons; 'Map Index Sort' with a dropdown menu currently set to 'Upper Right'; 'Map Series Scale' with a dropdown menu; and several optional text input fields for 'Partner Preparer(s)', 'NPS Preparer(s)', 'Partners Contact', and 'NPS Contact'. On the right side, there is a 'Road Sign Plan Report' panel with a description of the tool's function. At the bottom, there are buttons for 'OK', 'Cancel', 'Environments...', '<< Hide Help', and 'Tool Help'.

Road Sign Plan Report

This tool will generate a road sign plan report based on the user's selection. This report includes a title page, table of contents, a map sheet index, a sign plan map series, a report of the signs, summaries, and sign plan specification sheets depending on the trails chosen.

The Sign Plan Report Tool

```
el mxd

Set the index page extent to the minimum bounding box created previously and create a new temp mxd
mxd = arcpy.mapping.MapDocument(tempWorkspace + "\Signs_MapSeriesOverview3.mxd")
df = arcpy.mapping.ListDataFrames(mxd)[0]
layer = arcpy.mapping.Layer(workspace + "\Temp_MBG.shp")
newextent = layer.getExtent()
df.extent = newextent
mxd.saveACopy(tempWorkspace + "\Signs_MapSeriesOverviewCopy.mxd")
el pmxd, pdf, player, newextent
```

```
Replace filepath used for script creation to the filepath that user selected as workspace
xd = arcpy.mapping.MapDocument(spFiles + "\RoadSignsTemplates\Signs_MapSeriesPages.mxd")
adjustVersionLabel(mxd)
xd.findAndReplaceWorkspacePaths(spFiles + "\RoadSignsTemplates\SignPlanTemplates", workspace, False)
```

Make the appropriate trails visible, so that only the trails of interest are shown in the legend

```
or lyr in arcpy.mapping.ListLayers(mxd):
    if lyr.name == trail1:
        lyr.visible = True
or lyr in arcpy.mapping.ListLayers(mxd):
    if lyr.name == trail2:
        lyr.visible = True
or lyr in arcpy.mapping.ListLayers(mxd):
    if lyr.name == trail3:
        lyr.visible = True
or lyr in arcpy.mapping.ListLayers(mxd):
    if lyr.name == trail4:
        lyr.visible = True
or lyr in arcpy.mapping.ListLayers(mxd):
    if lyr.name == trail5:
        lyr.visible = True
```

Assign User Generated Plan name onto Map Index Page

```
pnext = arcpy.mapping.ListLayoutElements(mxd, "TEXT_ELEMENT", "txtUGSignPlanName")[0]
pnext.text = planName
xd.saveACopy(tempWorkspace + "\Signs_MapSeriesPages2.mxd")
el mxd, lyr, pnext
```

Create a copy of the Estimates excel file, and then perform a spatial joins to assign the sign cost from the excel sheet to the associated feature class

```
outTable = "Estimates"
arcpy.ExcelToTable_conversion(spFiles + "\\CostEstimates\\tbl_RoadSignCostEstimates.xlsx", workspace + '\\' + outTable, "Cost_Estimates")
arcpy.AddField_management(workspace + '\Temp_Signs.shp', 'Cost_Join', 'TEXT', '#', '#', '#', '#', 'NULLABLE', 'NON_REQUIRED', '#')
arcpy.CalculateField_management(workspace + '\Temp_Signs.shp', 'Cost_Join', '!SIGNTYPE! + !REFLECT!', 'PYTHON_9.3', '#')
arcpy.AddField_management(workspace + '\Estimates', 'Cost_Join', 'TEXT', '#', '#', '#', '#', 'NULLABLE', 'NON_REQUIRED', '#')
arcpy.CalculateField_management(workspace + '\Estimates', 'Cost_Join', '!SIGNTYPE! + !REFLECTIVE!', 'PYTHON_9.3', '#')
arcpy.JoinField_management(workspace + '\Temp_Signs.shp', 'Cost_Join', workspace + '\Estimates', 'Cost_Join', '#')
```

Over 1000 lines of code!

Pony Express National Historic Trail sign standards

General sign specifications

- Anodized aluminum backing, with engineering or high intensity grade reflective sheeting per road jurisdiction standards
- White text and border on a brown background
- Minimum 4" text height on all signs, fonts NPS Rawlinson (serif) and Series E 2000 (sans-serif)
- Holes pre-drilled per installer instructions or drilled on site by installer
- All signs typically manufactured by Utah Correctional Industries Sign Shop, although a local vendor may be selected under certain circumstances

Individual sign types All images are not to scale

4" text height
NPS Rawlinson

13" NHT logo

4" text height
Series E 2000

MUTCD arrow M6-1
(or other arrows in the M6 series for other directional options)

Historic Site Name standard directional signs

- 36" width x 48" height main panel
- 1" white border on main panel
- 21" width x 15" height MUTCD arrows
- 4" text height
- 13.5" NHT logo
- 2 post mount typical
- Site name may include 1, 2 or 3 lines of text

Pony Express Historic Trail standard signs based on this model:

1
NPS NTR 1/2013

Sign Installation

The Future of the Sign Plan

- **Test compatibility w/ ArcGIS Pro**
 - **No report functionality on Pro**
- **Possibly find new python package**
 - **"Arcrest" is no longer being serviced**
 - **Move to ArcGIS API for python?**
- **Create an 11x17 inches parameter on tool window**

Thank You...
