    Presenter: Angie Southwould, NPS Alaska Region, Lead GIS Data Manager

    Maintaining Trail Data in Alaska Region Parks
    After working with Trail Specialists and Facility Managers in Alaska parks, the Alaska Region GIS Team designed a regional Trail Spatial Data Standard in 2013 intended to streamline field data collection and work as seamlessly as possible with the NPS Facilities Management Software System (FMSS). In the six years since initial implementation, we've learned many lessons that have helped us make continual improvements to the design and workflows surrounding data collection and maintenance. Please join us to learn more about this journey.

NTS GIS Network Mission:
We established the NTS GIS Network as a way to connect the diverse array of National Trails System staff and partners who use GIS systems and products in their work. One of our goals is to facilitate the sharing of information and tools that help us do our jobs more efficiently and innovatively. Because the national trails system is managed as a collaboration of agencies and partner organizations, the NTS GIS Network is open to anyone.
