National Trails System
GIS Network

Join the National Trails System GIS Network to connect with the diverse array of National Trails System staff and partners who use Geographic Information System (GIS) and products in their work.

The network was formed in 2011 to facilitate the sharing of information and tools that help GIS Professionals and Trail Advocates do their jobs more efficiently and innovatively.

Because the national trails system is managed as a collaboration of agencies and partner organizations, the NTS GIS Network is open to all who are interested.

Webinars and interactive discussions are hosted on the 3rd Tuesday of each month quarterly and cover a wide range of topics concerning the national trails system, such as:

- Web Mapping Tools and Applications
- Trail Gap Analysis
- Tracking and Monitoring Trails Assets
- Implementing Data Standards
- Trail Digitization Methodology and Application

Contact Us

To find out about upcoming webinars, connect with National Trails System GIS Network members, and join the NTS GIS Network email list, send an email to ntsgis@nps.gov or contact one of the three moderators of the NTS GIS Network:

Ryan M. Cooper
